

Symplicity Accommodate

Section 1194.22 Web-based Internet information and applications
Voluntary Product Accessibility Template™

CRITERIA	SUPPORTING FEATURES	REMARKS AND EXPLANATIONS
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supports	All images and form elements use the appropriate alt, title, or longdesc attribute or label tag.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	No multimedia presentations are present.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports	Color is used to indicate priority or status. When color is used as an indicator it is accompanied by an icon image with text equivalent, abbreviation, or text-based token.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports	Documents are organized in a top-down linear fashion and are fully readable without the use of an associated style sheet.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	Server-side image maps are not used.
(f) Client-side image maps shall be provided	Not Applicable	Client-side image

instead of server-side image maps except where the regions cannot be defined with an available geometric shape.		maps are not used.
(g) Row and column headers shall be identified for data tables.	Supports	All data tables use TH tags with the scope attribute.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not Applicable	There are no data tables with two or more logical levels of row or column headers.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Supports	All frames use title attribute.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Not Applicable	Content does not flicker.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Supports	An Accessible Mode switch (link) allows the user to ensure all content and functionality is available to Assistive Technology solutions.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Supports	Content displayed by scripts is readable by Assistive Technology.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Supports	When the system provides content in PDF, Excel, or other formats that require an applet or plug-in, the user is provided a link to download a free viewer application.

<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supports</p>	<p>Form elements are fully labelled and accessible to people using Assistive Technology when Accessible Mode is On.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Supports</p>	<p>Every page begins with a "Skip to content" link.</p>
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>Not Applicable</p>	<p>No pages require a timed response.</p>
